

SOCIOLOGICAL CONCEPTS

**COURSE FACILITATOR: Ms.
Shubhankshi Sonker**

INTRODUCTION

- This course will aim to lay the foundation for students and will assist them in applying sociological perspective, sociological concepts, and principles to substantive areas.

OBJECTIVES

- To understand the nature and scope of sociology as a discipline, and its distinct focus on social facts, relationships, and institutions.
- To introduce key sociological concepts such as institutions, communities, associations, groups, and society and to examine sociology's relationship with other social sciences.

OBJECTIVES

- To understand the significance of social ecology in studying the relationship between people, their environments, and social structures.
- To analyze the concepts of social structure and social system, including how they function to organize social life.

OBJECTIVES

- To understand social change and its impact on Indian culture and values, exploring both traditional and modern influences on society.

OUTCOMES

- Comprehensive understanding of the nature and scope of sociology as a discipline.
- Understanding of core sociological concepts and increased ability to differentiate between sociology and other social sciences and understanding of its interdisciplinary nature.

OUTCOMES

- Understanding of social ecology and the impact of physical and social environments on human behavior and social organization.
- Ability to apply the concepts of social structure and social systems to analyze the organization of societies.

OUTCOMES

- Understanding of social change and its effects on cultural values, traditions, and modernity, particularly in the Indian context
